

DUONG TAN MINH - SOFTWARE DEVELOPER

Email: dtminh.dev@gmail.com | Cell: (+84)764420250

LinkedIn: <https://www.linkedin.com/in/minhdt1105>

PERSONAL INTRODUCTION

A detail-oriented Software Developer with a strong drive to build dependable and scalable products. I enjoy both working across the full stack or focusing on specific stack, solving complex problems, and learning new tools to improve how things run. With nearly 3 years of experience, my career objective is improving, completing my skills continually in order to build interactive, convenient, modern applications those would bring value to society and make life better.

TECHNICAL SKILLS

Programming Languages: Javascript, Typescript & C#

Frameworks/Platform: ReactJS, NextJS, NodeJS, .NET

Others: HTML5, CSS3, SASS, Responsive Design, JSON, UI Libraries (TailwindCSS, Material UI, AntD, ShadcnUI), State Management (Context API, Redux, Zustand), Web Components, Websocket, Progressive Web App, SEO, Power Platform.

- Knowledge: REST API, Good understanding of OOP Methodologies, SOLID, Data Structures, Design Pattern, Data Modelling and Generative AI.
- Familiar tools: Visual Studio Code, Visual Studio, MSSQL, Version Control System (Git), Jira, AI Tools, Github, Gitlab, Figma.

WORK EXPERIENCE

Fullstack Developer

Scavi (04/2025 - Now)

Projects: SCAF (ERP), ISCAF (Mobile App)

- Responsibilities:

- Developed, optimized and maintained: Desktop ERP WinForms Application while integrating the system with SAP and Centric systems, Power Apps with Power Automate, Power BI Report in Power Platform and Backend API Services
- Ensured the reliability and efficiency of applications by implementing performance optimization techniques for more than 10000 users.
- Actively participated in teamworking and contributed to weekly meetings with task management on Jira.
- Proactively identified and provided solutions for intricate technical issues to maintain application stability and performance.
- Worked closely with colleagues, end-users and product manager to translate design wireframes into functional user interfaces, ensuring a seamless user experience and technical feasibility.

- Members: 1 PM, 1 Techlead, 6 Fullstack, 2 QA

- Technologies: C# .NET, WinForms, Power Platform, NodeJS, ExpressJS, TypeScript, MSSQL.

Front-end Developer

DevDirect (04/2024 - 04/2025)

Projects: [Metaflyer](#) (Web Builder - CRM) and KNOU (Korea National Open University - CMS)

- Responsibilities:

- Developed, optimized and maintained front-end web applications with micro-frontend.
 - Ensured the reliability and efficiency of websites that handled large amount of requests smoothly.
 - Conducted pair programming, joined in code reviews and stand-up meetings which uphold coding standard and best practices.
 - Troubleshooted and provided solutions to resolve complex issues to maintain website stability and performance and bring the most quality UI/UX.
 - Wrote clean and quality code to make reusable components and utilities to accelerate the development process and productivity.
- Members:** 1 PM, 1 Techlead, 2 Fullstack, 3 Frontend, 1 QA
- Technologies:** ReactJs, NextJs, VueJs, NuxtJs, AntD, SASS.
- Features:** Web Builder, Builder History, Inline Update, Forms, Embedding Elements, Dynamic Components.

Front-end Developer

BeanOi Company (04/2022 - 07/2023)

BeanOi (Web app, Mobile app, Tini App): an application that enables people to order food with ease and convenience. Served over 300 students at rush hours.

- Responsibilities:

- Developed, maintained and optimized web and mobile application for customer, staff and administration management , implemented landing page, blog page and order page.
- Developed and implement Tini app on Tiki.

- **Members:** 1 Techlead, 1 Devops, 2 Backend and 3 Frontend.

- **Technologies:** ASP.NET, Flutter, ReactJs, TypeScript, Material UI, Ant Design, Next JS, Firebase.

- **Features:** Admin CMS, Blog, Ordering.

SIDE PROJECTS

PhuongNamCompany (1 Fullstack, 1 BA)

an [ERP web application](#) as the internal system of the company and a [Landing Page](#).

- **Responsibility:** Fullstack Developer

- Building from scratch and developing Front-end, Back-end and DevOps deployed on Ubuntu server with CI/CD workflows.
- Handled web push notification between FE and BE with PWA and integrated responsive, user-friendly FE to BE seamlessly with RESTful APIs.
- Implemented main features: authentication, authorization, notification, task operation and management, warehouse and material management, business forms, PDF export, Excel import and export for data model.

- **Technologies:**

- Front-end: Vite, ReactJs, Nextjs, TypeScript, ShadcnUI with RadixUI, TailwindCSS, Tanstack Router, Zod. PWA (Progressive Web Application), Framer-motion.
- Back-end: NodeJs, Strapi, PostgreSQL.
- DevOps: Ubuntu, Github Action, Docker, Nginx.

ACHIEVEMENTS

First Prize at Tiki Hacking Trail 07/2022: Starting up a Tini App project using Tini Studio (BeanOi): order food with ease and convenience with timeslots and receiving destinations.

- Responsibilities: frontend development

Third Prize at FPT Entrepreneurial Hackathon 10/2022 (Co-Order): better fee by ordering together

- Responsibilities: Frontend development, Technical support.

The Most Promising Prize at FPT Entrepreneurial Hackathon 02/2023 (Campus Map): uses the Dijkstra algorithm to find the right classrooms on campus.

- Responsibilities: Frontend development, Technical support.

EDUCATION

FPT UNIVERSITY - HCM CITY

2019 - 2023

- **Major:** Software Engineering
- **Degree grade:** Good - GPA: 7.5/10
- **Programming Courses:** C# .NET, OOP, Database, Software Document, Data Structure and Algorithm, Java, Winform/WPF/Web Application & Rest APIs with C# .NET, Android Mobile Programming, Unity Programming, Software Requirements, Software Testing, UX/UI Development.
- **Certificates:** [Software Development Lifecycle](#), [UX/UI](#), [Web Design](#).

LANGUAGE:

- English: Upper Intermediate (~6.0 IELTS)
